FOREWORD

It gives me great pleasure to present my 2006-07 general report to the national parliament, municipal councils and provincial legislatures, summarising the results of the audit outcomes of local government, excluding municipal entities, for the financial year ended 30 June 2007.

The purpose of this general report is to provide an overview of the audit outcomes of local government as well as help guide the executive, legislatures and councils to work towards achieving financially unqualified audit opinions. It complements countrywide roadshows, in which I presented an overview of these audit outcomes to mayors and facilitated dialogue on the understanding of their root causes and possible solutions thereto. Where possible these discussions were held with the members of both the executive and the legislatures.

The main body of this report covers an overview of the financial reporting results (section 1), overview of performance reporting results (section 2) and the issues driving audit conclusions for financial and performance reporting, specifically for qualified audit results (section 3). In addition, supplementary annexures are also provided to further enhance understanding of the state of affairs of local government.

We also make recommendations on how municipalities can improve their governance and financial control systems. This is done in an effort to continue to make audit reports more relevant to enable as wide a range of stakeholders as possible to use our reports and gain insight into the manner in which South Africa's public resources are accounted for.

Considerable attention needs to be dedicated to the issues of accountability and governance in the public sector. In this regard, the attainment of financially unqualified audit reports by all government entities is a vision we fully subscribe to in our efforts to strengthen South Africa's democracy, thereby building public confidence. The critical message we want to highlight is that it is possible to obtain an unqualified audit report if the basics of internal control systems, specifically document control, are in place and constantly monitored by the leadership. The analysis further provides specific reference to the areas where these internal control shortcomings were identified.

In total, local government, excluding municipal entities, comprises 283 municipalities, categorised as: six metros, 44 high-capacity, 104 medium-capacity and 129 low-capacity municipalities. The results of 13 municipalities are not included in this report due to capacity constraints in finalising prior year audit backlogs and annual financial statements that were not submitted on time.

The audit outcomes for the municipalities according to grading are 1:

- metro: three qualified and three financially unqualified (with other matters)
- high capacity: four adverse, 11 disclaimer, 14 qualified and 12 financially unqualified (with other matters)

¹ Refer to glossary of terms for definitions of audit classifications

- medium capacity: six adverse, 40 disclaimers, 27 qualified, 24 financially unqualified (with other matters) and one financially unqualified (with no other matters)
- low capacity: 15 adverse, 67 disclaimers, 27 qualified, 14 financially unqualified (with other matters) and two financially unqualified (with no other matters).

Twenty-five (25) municipalities, four high capacity, six medium capacity and 15 low capacity, obtained an adverse audit opinion, which is one of the worst categories of audit opinions. These, together with the 11 high-capacity municipalities, 40 medium-capacity municipalities and 67 low-capacity municipalities that obtained a disclaimer of audit opinion, the other worst audit opinion, in particular, face serious challenges to improve their financial management and significant efforts are required to turn the situation around in these municipalities.

The widespread balance sheet and income statement audit findings are indicative of poor financial management, which is further reflected by a lack of adequate internal controls and lack of supporting documentation. Furthermore, there is a challenge for municipalities to capacitate themselves to fully comply with the prescribed accounting framework, particularly with respect to receivables, non-current assets and payables and borrowings.

The majority of the audit qualifications were as a result of internal control weaknesses in the areas of compliance with established controls (86%) and a lack of effective monitoring of financial controls by leadership (80%). Refer to section 3 for a detailed discussion.

In addition to the financial qualifications, the majority of the municipalities had shortcomings in:

- compliance with applicable legislation (89%), relating mainly to compliance with the Municipal Finance Management Act and the Municipal Systems Act
- governance (67%), relating mainly to the effectiveness of both individual and shared audit committees and internal audit functions
- internal controls, relating to the areas of material adjustments to financial statements (50%) during the audit that were initially not detected by the municipalities' own internal controls.

Addressing the identified shortcomings highlighted in this report will require a coordinated effort by a number of parties to turn the situation around. This would entail the proactive involvement and leadership visibility of the national and provincial Accountants-General, the provincial Departments of Local Government and Finance as well as the provincial Auditor-General's office in complementing the more obvious role of the municipal councils, MECs for Local Government, mayors and municipal managers. The respective roles are as follows:

1. Role of the Auditor-General

- To monitor progress on the 2008 audit process and implementation of action plans from 2007
- To maintain the visibility of senior management throughout the audit process in order to improve adequate supervision of junior audit staff and private audit firms
- To strengthen cooperation with internal auditors with a view to better planning and coordination of audit execution throughout the year

2. Role of the Accountant-General

- To review the appropriateness of grading and categorisation of municipalities in relation to their current status and financial management challenges
- To supplement guidance and training for mayors and municipal managers in relation to financial management accountability, where necessary
- To provide accounting guidelines to address other account balances linked to legacy issues
- To define the urgent role and focus of internal audit units and audit committees in order to assist with the attainment of unqualified audit reports
- To provide guidance on building the capacity of internal audit, which could include innovative ways of sourcing candidates

3. Role of MECs for Local Government and Finance

- To coordinate the establishment of internal audit units and audit committees, including the effective utilisation of internal audit and audit committee shared services, where applicable
- To coordinate good practices existing in municipalities that received unqualified audit opinions and to utilise this opportunity for knowledge sharing and twinning
- To provide continuous support to mayors in their monitoring and implementation of financial management action plans, particularly on capacity constraints and the effective management of consultants

A detailed discussion is provided in section 4.

While much needs to be done to improve performance and thereby service delivery, I am confident that the tide can be turned towards achieving financially unqualified audit opinions and I will follow up on the action plans developed for improved local government performance and report on the related progress in the next general report.

In conclusion, I wish to thank the AGSA's staff in each province for their diligent efforts towards the fulfilment of our constitutional mandate. I would like to express my appreciation to the councillors, MECs for Local Government, mayors and officials from the municipalities for their cooperation and input during my visits to present the audit outcomes. Together we will continue to make every effort to collaborate in order to contribute to the strengthening of our country's democracy.

Auditor-General Pretoria

Anditor-General

December 2008

SECTION 1: FINANCIAL REPORTING RESULTS

1.1 Introduction

According to the information available at the time of our analysis local government, excluding municipal entities, comprises 283 municipalities consisting of six metros, 44 high-capacity, 104 medium-capacity and 129 low-capacity municipalities. The results of 13 municipalities are not included in this report. Refer to section 1.2 below for the reasons for the delay and the expected date of audit completion.

1.2 Overview of status of completion of the audits of municipalities for 2006-07

Table 1 below provides details of the status of completion of the audits of municipalities.

Table 1: Status of completion of audits of municipalities as at 30 November 2008

Province	Total	Audit completed	Audit outstanding	% Completion
Eastern Cape	45	45	0	100%
Free State	25	19	6	76%
Gauteng	14	14	0	100%
KwaZulu-Natal	61	61	0	100%
Limpopo	30	25	5	83%
Mpumalanga	21	21	0	100%
North West	25	23	2	92%
Northern Cape	32	32	0	100%
Western Cape	30	30	0	100%
Overall	283	270	13	95%

Free State (6)

The reasons for the delay in the completion of the audits of six municipalities (Letsemeng, Mafube, Maluti-A-Phofung, Phumelela, Tokologo and Xhariep) are financial statements that are outstanding or were submitted late.

Limpopo (5)

The reason for the delay in the completion of the audits of five municipalities (Ba-Phalaborwa, Capricorn, Greater Letaba, Greater Sekhukhune and Polokwane) is capacity constraints at the municipalities as a result of high vacancy rates and these audits are expected to be completed in the 2007-08 MFMA audit cycle.

North West (2)

The reasons for the delay in the completion of the audits of two municipalities (Kagisano and Mamusa) are outstanding annual financial statements and the completion of prior year backlogs.

1.3 Overview of audit opinions on municipalities per province for 2006-07

• Table 2 below provides details of the actual audit outcomes of the municipalities.

Table 2: Audit opinions on municipalities

Type of audit opinion	200	6-07	200	5-06
	Number	%	Number	%
Adverse	25	9%	28	10%
Disclaimer	118	44%	130	48%
Qualified	71	26%	67	25%
Financially unqualified (with other matters)	53	20%	43	16%
Financially unqualified (with no other matters)	3	1%	2	1%
Total analysed	270	100%	270	100%

From the above table it is clear that there has been little or no improvement when compared to the prior year. Fifty-three per cent of municipalities, compared to 58% in the previous year, obtained a worst-case audit opinion (adverse or disclaimer).

The majority of adverse and disclaimer audit opinions were from (i) the Eastern Cape (35) (ii) the Northern Cape (26) (iii) Limpopo (22) and (iv) other provinces combined (60), while 71 (26%) municipalities were financially qualified. This current trend of financial qualifications requires the leadership to develop action plans to address the internal control weaknesses and deficiencies that led to the audit findings reported.

• Tables 3 and 4 provide details on the actual audit outcomes per province.

Table 3: Audit opinions on municipalities per province for 2006-07

Province	Adverse	Disclaimer	Qualified	Financially unqualified (with other matters)	Financially unqualified (with no other matters	Total
Eastern Cape	12	23	9	1	0	45
Free State	0	10	8	1	0	19
Gauteng	1	3	4	5	1	14
KwaZulu-Natal	2	17	24	1 <i>7</i>	1	61
Limpopo	5	17	1	2	0	25
Mpumalanga	2	5	3	11	0	21
Northern Cape	1	25	4	2	0	32
North West	2	16	1	4	0	23
Western Cape	0	2	17	10	1	30
Total	25	118	71	53	3	270
Percentages of total	9%	44%	26%	20%	1%	100%

Table 4: Audit opinions on municipalities per province for 2005-06

Province	Adverse	Disclaimer	Qualified	Financially unqualified (with other matters)	Financially unqualified (with no other matters)	Total
Eastern Cape	3	38	3	1	0	45
Free State	2	13	4	0	0	19
Gauteng	2	2	4	6	0	14
KwaZulu-Natal	3	19	24	14	1	61
Limpopo	7	13	4	1	0	25
Mpumalanga	3	3	6	9	0	21
Northern Cape	1	27	4	0	0	32
North West	5	13	1	3	1	23
Western Cape	2	2	17	9	0	30
Total	28	130	67	43	2	270
Percentages of total	10%	48%	25%	16%	1%	100%

Overall there has been a slight decrease of worst-case opinions (adverse and disclaimer) from 58% in 2005-06 to 53% in 2006-07; however, the number of adverse opinions in the Eastern Cape has increased from three to 12. The leadership of this province is faced with a serious challenge to develop action plans in time to remedy the situation for the next cycle.

It is encouraging to note an increase in the number of municipalities that are now financially unqualified with or without other matters (56 in 2006-07 versus 45 in 2005-06). However, the 53 municipalities that are financially unqualified but had concerns in the areas of non-compliance, governance and material misstatement require the focused attention of the leadership to prevent their current financial management practices from worsening.

 Table 5 below provides details of the actual audit outcomes of the municipalities according to their respective capacities.

Table 5: Audit opinions on municipalities per grade for 2006-07

Capacity	Adverse	Disclaimer	Qualified	Financially unqualified (with other matters)	Financially unqualified (with no other matters)	Total analysed
Metro	0	0	3	3	0	6
High capacity	4	11	14	12	0	41
Medium capacity	6	40	27	24	1	98
Low capacity	15	67	27	14	2	125
Total	25	118	71	53	3	270

Fifty per cent or three metros (Nelson Mandela, City of Tshwane and Ekurhuleni Metro) were qualified, while Nelson Mandela was only qualified in respect of assets, which indicates that Nelson Mandela Metro can assist other municipalities that have qualifications in other areas.

Fifteen higher-capacity municipalities were qualified with worst-case opinions (adverse and disclaimer). Of the 13 qualifications, King Sabata Dalindyebo was qualified with 12 qualifications while Ukhahlamba District, Madibeng, Moqhaka, Matjhabeng and Sol Plaatje had 11 qualifications.

Overall it is therefore doubtful that metros and high-capacity municipalities will be in a position to exercise their oversight/support role more effectively for medium- and low-capacity municipalities when they themselves have been qualified. The current trend of financial qualification (metro three and high capacity 29) poses a serious challenge to the leadership to develop action plans in time to address the internal control impacting financial management.

1.4 Audit opinions on municipalities per district for 2006-07

Below is a summary of the actual audit outcomes of the municipalities per provincial district. Refer to annexure 3 for detailed information.

Eastern Cape

Of the seven district municipalities within the Eastern Cape, including the metro, 86% (six district municipalities) were financially qualified, while the remaining Cacadu District (14%) was financially unqualified (with other matters).

Free State

In the Free State, none of the district municipalities achieved financially unqualified opinions, which questions their ability to guide and support municipalities within their districts. Opportunities therefore exist for other districts to implement the good practices existing in the Tswelopele Local Municipality, in an attempt to address their particular audit qualifications.

Gautena

It is encouraging to note that, of the six district municipalities in the Gauteng Province, including the metros, 67% (four district municipalities) were financially unqualified (with or without other matters).

KwaZulu-Natal

Overall, of the 11 district municipalities in KwaZulu-Natal, including the metro, seven (64%) were financially qualified, while the remaining four (36%) were financially unqualified (with other matters). Amajuba, Sisonke and Umkhanyakude were the worst performing districts with all their municipalities being qualified, while the uThukela and Umzinyathi districts also had more than 80% of their municipalities qualified and uThungulu was the only district with a clean audit report.

Limpopo

The trend of financial qualifications cuts across all districts with only the Vhembe and Waterberg Districts having a municipality each that was unqualified (with other matters). The good practices in the Musina and Waterberg District Municipalities should be used when designing action plans to alleviate the situation at the Limpopo municipalities.

Mpumalanga

Of the six districts in Mpumalanga, including the metro, 33% (two district municipalities) were financially qualified, while the remaining four (67%) were financially unqualified (with no other matters).

Northern Cape

The trend of severe audit qualifications cuts across all the districts, with the exception of Francis Baard and Pixley ka Seme that are each represented by one municipality in the financially unqualified (with other matters) classification.

North West

Even though the Bojanala and Bophirima District Municipalities themselves were unqualified (with other matters), of particular concern is that most of the local municipalities within their districts obtained an adverse, disclaimer or qualified audit opinion.

Western Cape

Of the six district municipalities in the Western Cape, including the metro, 33% (two district municipalities) were financially qualified, while the remaining four (67%) were financially unqualified (with other matters). These four district municipalities in particular were well positioned to assist other municipalities to overcome challenges in financial management.

1.5 Qualification details

Figure 1 below provides a breakdown of all the audit findings which gave rise to the qualified audit opinions. It also provides an indication of the percentage of the municipalities that were qualified per audit finding. The audit findings are split between items in the balance sheet (statement of financial position) highlighted in blue bars and the income statement (statement of financial performance) highlighted in green bars. The associated root causes are discussed in section 3 of this report.

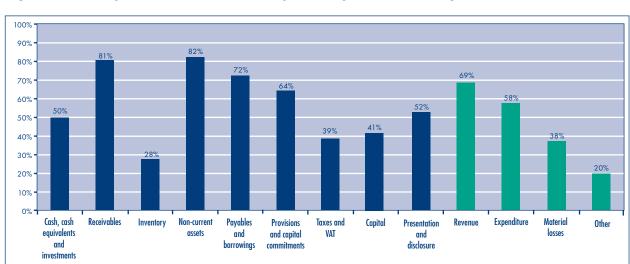

Figure 1: Municipalities (214) that were qualified per audit finding

Balance sheet items (blue bars)

A lack of adequate internal controls, lack of supporting documentation and a general lack of capacity and skills to fully comply with the prescribed accounting framework are the main contributing factors to the high proportion of audit qualifications related to the balance sheet.

Non-current assets and receivables were the main contributing factors to municipalities being financially qualified due to a lack of adequate supporting documentation to confirm the existence of assets and the completeness of revenue. Overall, assistance and guidance should be sought from both the National Treasury and provincial treasuries to strengthen the financial reporting processes.

Income statement (green bars)

The high incidence of audit qualifications in terms of revenue, expenditure and material losses indicates the municipalities' inability to account accurately for the spending of the revenue generated from the rendering of services. These inabilities are mainly due to the deficiencies in internal controls surrounding the validity, accuracy and completeness of recorded transactions. Further threats regarding the maladministration of such generated funds are raised.

1.5.1 Audit qualifications per capacity

Table 6 below provides a breakdown of all the audit findings which gave rise to the qualified audit opinions per grade of municipality. It also indicates where the remedial action to be implemented by management should be directed.

Table 6: Audit qualifications per grade

Audit qualifications	Metro	High capacity	Medium capacity		Total
Cash, cash equivalents and investments	0	11	31	66	108
Receivables	2	17	56	98	173
Inventory	0	6	21	32	59
Non-current assets	3	24	59	89	175
Payables and borrowings	1	19	49	86	155
Provisions and capital commitments	1	17	47	<i>7</i> 1	136
Taxes and VAT	0	11	26	47	84
Capital	0	9	30	48	87
Presentation and disclosure	0	16	37	59	112
Revenue	2	17	43	85	147
Expenditure	0	9	43	72	124
Material losses	1	8	29	43	81
Other	0	3	11	29	43
Total number of qualifications	10	167	482	825	1484

From the above table the following are evident:

a. Metros

For the three metros that were qualified the majority of findings related to the balance sheet, with capital assets being an issue for all three. With the assistance of the relevant provincial treasuries to resolve the audit qualifications, these three metros, together with the other three that were financially unqualified (with other matters), can exercise their oversight role more effectively within their respective provinces.

b. High-capacity municipalities

The majority of audit qualifications (78%) related to the balance sheet and it is therefore expected that the leadership would focus the bulk of their remedial action towards the balance sheet.

c. Medium-capacity municipalities

Similar to the high-capacity municipalities, medium-capacity audit qualifications predominantly related to the balance sheet, which is where the bulk of the remedial action should be focused by the leadership.

d. Low-capacity municipalities

There is a wide spread of audit qualifications covering both the balance sheet and income statement. However, with assistance, guidance and support from (i) high-capacity (ii) medium-capacity and (iii) district municipalities, low-capacity municipalities can improve their financial management and governance processes tremendously. The fact that three municipalities achieved a financially unqualified opinion demonstrates that this goal can be achieved by other low-capacity municipalities.

1.6 Audit findings related to other matters

The audit findings reported under "other matters" draw attention to the matters that are ancillary to the AGSA's responsibilities in the audit of the financial statements.

Figure 2 below provides further details on the findings associated with other matters, as well as the percentage of municipalities linked to the findings.

100% 89% 90% 80% 67% 70% 60% 50% 50% 40% 30% 20% 10% 0% Non-compliance Governance Material misstatements

Figure 2: Municipalities (266) linked to other matters

Non-compliance with applicable legislation

A high proportion of municipalities – 238 (89%) – had instances of non-compliance with the MFMA and MSA. The lack of compliance with the governing legislation stems from a lack of adequate supervision and monitoring processes by those charged with governance. All metros, 36 high-capacity, 85 medium-capacity and 111 low-capacity municipalities had such audit findings.

Governance

Effective internal audit functions and audit committees generally existed to provide management with, inter alia, additional assurance with regard to the effective functioning of developed internal controls that generate financial data, which is ultimately reported in the annual financial statements, and compliance with applicable legislation including municipally developed policy and procedures manuals. These functions are therefore key to achieving good governance and accountability and ensuring that risk management processes receive the appropriate attention.

However, 67% or 177 municipalities indicated deficiencies in the area of governance. Every effort should be made by management to fully capacitate the internal audit unit, attract and retain suitably qualified audit committee members and view these two units as an indispensable tool in discharging their responsibilities.

Material misstatements/corrections to the financial statements

One hundred and thirty-four (134) municipalities required material corrections to their financial statements due to errors, omissions and inconsistencies that were identified by the auditors. These material corrections could have been detected by the municipalities themselves had the internal audit unit and audit committee functions, as detailed above, functioned as expected and had the level of supervision and reviews been adequate.

These findings also related to municipalities lacking the skills and resources to prepare financial statements of a high quality that would not only comply with the applicable legislation and accounting framework, but also enable the AGSA to express a financially unqualified audit opinion. In this regard municipalities should work closely with their provincial treasuries to:

- develop a strategy that has the overall aim to improve financial management controls in order to produce accurate financial statements
- reduce the municipalities' sole dependence on the use of consultants to prepare a set of financial statements
- coordinate the good practices existing in municipalities that received unqualified audit opinions and utilise this opportunity for knowledge sharing and twinning.

SECTION 2: PERFORMANCE REPORTING RESULTS

2.1 Introduction

Sections 20(2)(c) and 28(1)(c) of the Public Audit Act, 2004 (Act No. 25 of 2004) (PAA) require the AGSA to provide an opinion or conclusion on the performance of the auditee against predetermined objectives. Section 13 of the PAA requires the AGSA to determine the standards to be applied in performing such audits. The AGSA has adopted a phasing-in approach to comply with the PAA in the auditing of performance information (PI). It is anticipated that the required maturity level will only be reached during the 2009-10 financial year when the AGSA may be in a position to issue an opinion on PI. Annexure 6 contains details of the phasing-in approach.

During May 2007 the NT issued the Framework for managing programme performance information² that is applicable to all spheres of government. This framework aims, inter alia, to clarify definitions and standards pertaining to PI, improve the systems and processes required to manage PI, and promote accountability and transparency in providing oversight bodies with timely and accurate PI. It is hoped that this framework will go a long way towards addressing the shortcomings in managing and reporting on PI. The NT has considered information published by institutions like the Reserve Bank and Statistics South Africa to facilitate improved coordination of oversight in the management of programme performance information. Refer to annexure 6 for details on the framework.

2.2 Overview of the results of the auditing of performance information

The AGSA continued to report on the auditing of performance information in line with the relevant phasingin approach. For 2006-07 the review was extended to the controls and systems used in generating and reporting on performance information.

Below are extracts from the individual provincial general reports.

Eastern Cape

Twenty-eight per cent of all municipalities in the Eastern Cape did not report performance information and a further 20% did not provide any form of supporting documentation to assess their respective performance against individual predetermined targets and measurable objectives contained in their strategic plans. Therefore, performance audit committees need to exist and play a critical role in ensuring that the municipalities' measurable objectives are regularly monitored, reported and supported by adequate supporting documentation which will facilitate the tracking of service delivery.

Free State

Fifty-eight per cent of municipalities in the Free State did not provide any form of supporting documentation to assess their respective performance against individual predetermined targets and measurable objectives contained in their strategic plans. Therefore, performance audit committees need to exist and play a critical

² The Framework for managing programme performance information, report number RP86/2007, is available at www.treasury.gov.za

role in ensuring that the municipalities' measurable objectives are regularly monitored, reported and supported by adequate supporting documentation which will facilitate the tracking of service delivery.

Gauteng

The findings reported under performance information indicate a need for the developed internal controls to be constantly reviewed to ensure that municipalities in the Gauteng Province maintain good audit results and, in so doing, provide credibility for the tracking of service delivery.

KwaZulu-Natal

Fifty-five per cent of all municipalities in KwaZulu-Natal did not report performance information against performance measures as contained in their IDPs/strategic plans/annual performance plans, while a further 30% did not provide performance information for audit purposes. Therefore, performance audit committees need to exist and play a critical role in ensuring that the municipalities' measurable objectives are regularly monitored, reported and supported by adequate supporting documentation which will facilitate the tracking of service delivery.

Limpopo

Despite the fairly satisfactory results shown for the audit of performance information, a need remains for the developed internal controls to be constantly reviewed to ensure that municipalities in the Limpopo Province maintain these good audit results and, in so doing, improve the tracking of service delivery.

Mpumalanga

Sixty-seven per cent of all municipalities in Mpumalanga did not provide any form of supporting documentation in time to assess their respective performance against individual predetermined targets and measurable objectives contained in their strategic plans. With the high incidence of findings reported on the existence and functioning of performance audit committees (57%) and the lack of internal auditing of performance information (57%), the extent to which one can reliably interpret the results of AOPI is doubtful. The leadership therefore needs to address the concerns in the reporting of performance information that will enable stakeholders better to assess the municipalities' performance in terms of service delivery.

Northern Cape

Seventy-five per cent of all municipalities in the Northern Cape did not report their performance against individual predetermined targets and measurable objectives contained in their strategic plans. Therefore, performance audit committees need to exist and play a critical role in ensuring that the municipalities' measurable objectives are regularly monitored, reported and supported by adequate supporting documentation which will facilitate the tracking of service delivery.

North West

Fifty-seven per cent or less municipalities in the North West either did not provide any form of supporting documentation to assess their respective performance against individual predetermined targets and measurable objectives contained in their strategic plans, or did not report on such targets in their annual reports. Therefore, performance audit committees need to exist and play a critical role in ensuring that the municipalities' measurable objectives are regularly monitored, reported and supported by adequate supporting documentation which will facilitate the tracking of service delivery.

SECTION 3: ISSUES DRIVING AUDIT RESULTS

3.1 Introduction

The following benchmark information is considered to be the basic good practice indicators which are relevant for achieving financially unqualified audit opinions as well as for adequately reporting performance results:

- Clear trail of supporting documentation
- Quality of financial statements and management information
- Timeliness of financial statements and management information
- Availability of key officials during audits
- Development of, and compliance with, risk management and good internal control practices
- Supervision and monitoring (leadership effectiveness)

3.2 Achievement against good practice indicators

Table 7 below presents the results of the municipalities achieving the said good practice indicators.

Table 7: Results of good practice indicators for municipalities for 2006-07

No.	Good practices	Percentage of total municipalities achieving good practice indicators ³
1	Clear trail of supporting documentation that is easily available and provided in time	33%
2	Quality of financial statements and management information	16%
3	Timeliness of financial statements and management information	75%
4	Availability of key officials during audits	49%
5	Development of, and compliance with, risk management and good internal control and governance practices	17%
6	Supervision/monitoring	31%

Clear trail of supporting documentation

The majority (67%) of the municipalities have to do more to ensure that sufficient appropriate audit evidence is available to support the transactions and balances in the financial statements. Significant

³ This would serve as a baseline to monitor future improvement

difficulties were experienced during the audits of 33% of the municipalities concerning delays in providing information or the unavailability of expected information. The management of documentation requires improvement to ensure that it is readily available and furnished in a timely manner. The discipline of document retention significantly reduces the risk of fraud in the environment.

Quality annual financial statements

Good practice requires annual financial statements to be prepared and submitted for auditing in accordance with the auditee's applicable accounting framework. Only 16% (42) of municipalities had submitted a set of financial statements that complied fully with their accounting framework, as evidenced by the high incidence of material corrections that were made, which were only detected following the auditors' scrutiny. This practice requires significant improvement with the support of adequate reviews at the correct levels, such as the chief financial officer, internal audit and audit committee.

• Timeliness of annual financial statements

Despite the high incidence of timely submission (75%), the quality was lacking, as detailed above.

Availability of key officials

It is discouraging to report on the low levels of key officials participating throughout the audit process (49% or 132 municipalities). Their future involvement would go a long way in reducing the 214 (79%) financial qualifications of this year.

Governance

Good practice requires a fully functional audit committee and internal audit unit that clearly identify the key business risks faced by the municipality and develop action plans that mitigate such risks. Only 17% exhibited this trend, which is in direct correlation with the 67% of governance audit findings as reported in figure 2 of this report. Effort should be focused on improving the effectiveness of internal audit and audit committees.

Supervision and monitoring

Eighty per cent of audit findings in respect of non-compliance with the MFMA and MSA were the result of a lack of basic management supervision and review. Therefore audit committees can assist management in providing oversight to ensure that the municipalities comply with applicable legislation as well as municipally developed policies and procedures.

SECTION 4: CONCLUSION

As highlighted in this report local government, excluding municipal entities, faces a number of challenges with financial management performance which will require a coordinated effort by the leadership of the province with the support of the National Treasury and provincial treasuries to turn the situation around. However, there are indications that progress is being made and the actions taken by the provincial treasuries and municipalities are welcome initiatives. The MECs for Local Government have also committed to developing action plans to address key issues and monitoring related progress, which we will report on the next general report.

We are confident that the challenges are not insurmountable and remain committed to working with the legislatures and the executive to assist in the process of identifying and disseminating good practices to increase governance and accountability, so as to build public confidence in the government's ability to account for public resources in a transparent manner.

ANNEXURE 4: SUMMARY OF OTHER AUDITS

4.1 Performance auditing

A performance audit is described as an independent auditing process to evaluate the measures instituted by management to ensure that resources have been procured economically and are used efficiently and effectively.

Performance auditing is concerned with the auditing of economy, efficiency and effectiveness and embraces:

- auditing of the **economy** in relation to the acquisition of resources in the right quantity, of the right quality, at the right time and place at the lowest possible cost
- auditing of the **efficiency** of utilisation of human, financial and other resources and the optimal relationship between the output of goods, services or other results and the resources used to produce them
- auditing of the **effectiveness** of performance in relation to achievement of the policy objectives, operational goals and other intended effects of the audited entity.
- Table 7 below provides details as to the other audit outcomes of the municipalities.

Table 7: List of other audits performed at municipalities

No.	Province	Municipality	Focus area(s)	Expected period in which report is to be tabled
1.	Eastern Cape	No performance audit undertaken	N/a	N/a
2.	Free State	No performance audit undertaken	N/a	N/a
3.	Gauteng	No performance audit undertaken	N/a	N/a
4.	KwaZulu-Natal	No performance audit undertaken	N/a	N/a
5.	Limpopo	No performance audit undertaken	N/a	N/a
6.	Mpumalanga	No performance audit undertaken	N/a	N/a
7.	Northern Cape	No performance audit undertaken	N/a	N/a
8.	North West	No performance audit undertaken	N/a	N/a
9.	Western Cape	City of Cape Town	Performance audit of the infrastructure delivery process (phase 1)	Only management report to be issued.

4.2 Special investigations

"Investigation" as contemplated in section 5(1)(d) of the PAA is defined as an independent and objective process where procedures are performed in accordance with guidelines issued by the AG to facilitate the investigation of financial misconduct, maladministration and impropriety, which may result in legal proceedings for adjudication, and ensure probity in the accounts, financial statements and financial management of an institution referred to in section 4(1) and section 4(3) of the PAA, and which may result in legal proceedings for adjudication. An investigation may be performed where the AG:

- considers it to be in the public interest
- receives a complaint relating to such institution or its affairs, or
- · receives a request relating to such institution or its affairs, and
- deems it appropriate.

This will result in a report (as contemplated in section 20 of the PAA) or a special report (as contemplated in section 29 of the PAA).

Table 8 below provides details as to the other audit outcomes of the municipalities.

Table 8: List of other audits performed at municipalities

No.	Province	Municipality	Focus area(s)	Expected period in which report is to be tabled
1.	Eastern Cape	Mnquma Local Municipality	 Legal expenses Land sale transactions Appointment of officials and employment contracts Tender/procurement and project payment processes Income, sources of income and approved budget Council resolutions adopted during the period under review, especially the resolutions taken on 28 February 2006 The period under investigation was from 1 July 2005 to 30 June 2006 	Will be tabled as part of the regular audit report
		Lukanji Local Municipality (erstwhile Whittlesea Local Municipality)	Housing project situated at Extension 4, Whitlesea	Will be tabled as part of the regular audit report

Table 8: List of other audits performed at municipalities (continued)

No.	Province	Municipality	Focus area(s)	Expected period in which report is to be tabled
1.	Eastern Cape	Nkonkobe & Nxuba Local Municipality	Four housing projects	Will be tabled as part of the regular audit report
		King Sabata Dalindyebo Municipality	 Payroll (report signed 30 June 2006) Electricity metering and revenue collection contract 	Will be tabled as part of the regular audit report
2.	Free State	Free State: Mohokare Local Municipality	Cash focus system	February 2009
3.	Gauteng	No performance audit undertaken	N/a	N/a
4.	KwaZulu- Natal	No performance audit undertaken	N/a	N/a
5.	Limpopo	No performance audit undertaken	N/a	N/a
6.	Mpumalanga	No performance audit undertaken	N/a	N/a
7.	Northern Cape	No performance audit undertaken	N/a	N/a
8.	North West	No performance audit undertaken	N/a	N/a
9.	Western Cape	No performance audit undertaken	N/a	N/a

ANNEXURE 6: AUDIT COMMUNICATION AND REPORTING

Annexure 6.1: Report of the Auditor-General and modification of the audit opinion

Report of the Auditor-General (to Parliament and the provincial legislature) on the financial statements and performance information

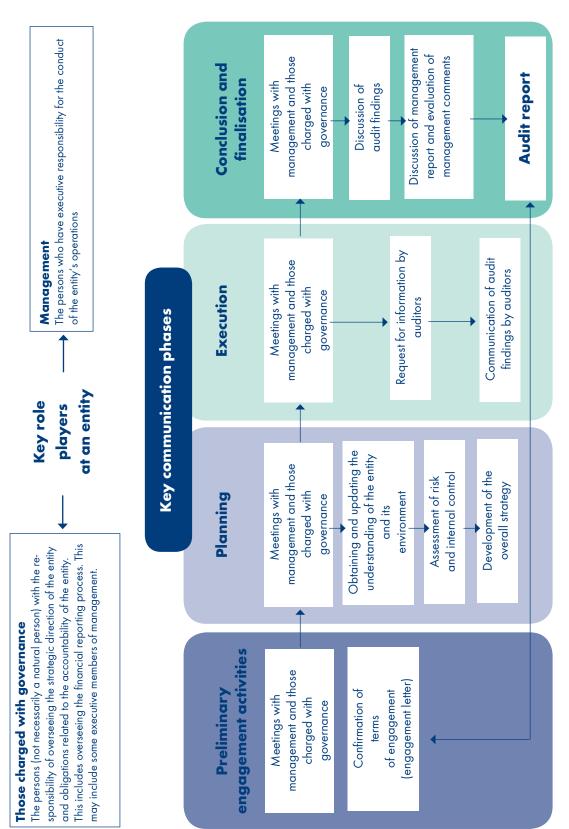

Effect is not so materic and pervasive as to Departures from financial reporting framework, e.g require an adverse Qualified opinion Disagreement with management incorrect method of application of unacceptability of the accounting Matters that do affect the auditor's opinion inadequacy of disclosures. accounting policies Modification of the audit opinion: This decision tree illustrates the circumpolicies selected auditor concludes that a qualified opinion is and pervasive that the Effect is so material Adverse opinion inadequate stances under which the audit report would be modified Effect is not so materia and pervasive as to equire disclaimer of Qualified opinion procedures believed to be necessary accounting records are inadequate Imposed by the circumstances, e.g.: auditor unable to carry out audit insufficient and/or inappropriate Imposed by the entity Limitation on scope Annexure 6.1: continued - Modification of the audit opinion audit evidence and pervasive that the Disclaimer of opinion Effect is so material auditor is unable to express an opinion Matters that do not affect the auditor's opinion the financial statements respect of the audit of Additional reporting responsibilities in matters Other he financial statements Material inconsistency ncluded in the annual included in a note to report with financial of other information Highlight of matter (departures and Emphasis of accounting deviations) Significant uncertainty statements Basis of matters Going concern

Annexure 6.2: Communication in the audit process

ANNEXURE 7: PHASING-IN APPROACH FOR THE AUDITING OF PERFORMANCE INFORMATION

Phasing-in approach to the auditing of performance information

The AG has adopted a phasing-in approach for compliance with the relevant sections of the PAA until such time as a performance management and reporting framework has been legislated and the audited environment has reached a level of maturity so as to provide reasonable audit assurance in the form of an audit opinion or conclusion. It is anticipated that this maturity level will only be reached during the April 2009 – March 2010 financial year.

The phasing-in approach has the following advantages:

- The National Treasury has the time and opportunity to provide structure and discipline to the processes
 used by the management of public sector institutions to measure and report on performance information
 and to facilitate the implementation of the necessary systems.
- It will provide an appropriate level of assurance on the quality of reported performance information in each phase of the implementation.
- Seeing that the AG is committed to playing a constructive and, where appropriate, supportive role in
 order to assist the South African public service, it will provide ongoing advice and encouragement for
 continuous improvement in the quality, value and use of the information.
- The audit report will not be qualified in respect of performance information during the phasingin approach (until the 2008-09 financial year) to provide management of the auditees with the opportunity to set up the necessary internal policies, structures, systems and processes to manage and report on performance information.

The details of the phasing-in approach are as follows:

- 1. The audit procedures for auditing the performance information of the **April 2005 to March 2006** financial year were indicated in General Notice 544 of 2006, issued per Government Gazette 28723 of 10 April 2006 and General Notice 808 of 2006, issued per Government Gazette 28954 of 23 June 2006. The procedures included the following:
 - Obtain an understanding of the entity and its environment, including its internal control related to performance information.
 - Determine the level of performance reporting by **evaluating** the following aspects:
 - o The existence of, and reporting against, predetermined objectives
 - o The existence of specific, measurable and time bound objectives
 - o The consistency of reporting on predetermined objectives
 - o The format and presentation of the performance information in the annual report.

¹Although the National Treasury issued the Framework for managing programme performance information during May 2007, the legal status (i.e. compulsory/legally binding or only a guideline) has not been officially indicated by the NT.

No separate opinion on performance against predetermined objectives was included in the audit reports. Conclusions on performance reporting were reached as part of the financial audit process and material shortcomings in the process of reporting against predetermined objectives which came to the attention of the auditor during the audits were reported in the *Emphasis* of matter section of the audit reports.

- 2. The audit procedures for auditing the performance information of the **April 2006 to March 2007** financial year were indicated in *General Notice 646* of 2007, issued per Government Gazette 29919 of 25 May 2007. The procedures included the following:
 - Obtaining an understanding of the internal controls relating to performance information.
 - Documenting system descriptions for the systems relevant to reporting on performance information. The system descriptions should be verified by means of walkthrough tests.
 - Determining the stage of performance reporting by evaluating the following:
 - o The existence of, and reporting against, predetermined objectives
 - o The existence of specific, measurable and time bound objectives
 - o The consistency of the predetermined objectives recorded in the strategic plan, budget, quarterly reports and annual report
 - o The format and presentation of the performance information in the annual report.
 - Comparing reported achievement of performance against objectives to the information sources and conducting limited substantive procedures on the information.

No separate opinion on performance against predetermined objectives was included in the audit reports. Reporting in this regard formed part of the regularity audit process. Reporting related to material shortcomings in the process, systems and procedures of reporting against predetermined objectives that came to the attention of the auditor during the audit and that might impact on the public interest. This reporting was contained in the Other reporting responsibilities section of the audit report.

- 3. The audit procedures for auditing the performance information of the April 2007 to March 2008 financial year are indicated in General Notice 616 of 2008, issued per Government Gazette 31057 of 2008. The procedures include the following:
 - Obtaining an understanding of the internal policies, structures and processes relating to the management of, and reporting on, performance information.
 - Obtaining an understanding of the relevant systems and internal controls to collect, monitor and report performance information.
 - Evaluating the existence, consistency, format and quality of performance information.
 - Comparing reported performance information to relevant source documentation and conducting limited substantive procedures to ensure valid, accurate and complete performance reporting.

No separate opinion on performance against predetermined objectives will be included in the audit reports. Reporting in this regard forms part of the regularity audit process. Reporting will be in relation to material shortcomings in the process, systems and procedures of reporting against predetermined objectives that come to the attention of the auditor during the audit and that may impact on the public interest. This reporting will be contained in the Other reporting responsibilities section of the audit report.

AUDITOR-GENERAL

- 4. The audit procedures for auditing the performance information of the **April 2008 to March 2009 financial year** will include all the details referred to above for the 2007-08 financial year with additional procedures focusing on the validity, accuracy and completeness of reported performance information.
- 5. As from the **April 2009 to March 2010 financial year** auditors should obtain sufficient appropriate audit evidence as part of a systematic audit process that includes substantive procedures and testing the operational effectiveness of controls to a level of reasonable assurance.

ANNEXURE 8: FRAMEWORK FOR MANAGING PROGRAMME PERFORMANCE INFORMATION

The following information is an extract from the National Treasury's Framework for managing programme performance information that was issued during May 2007. The framework is applicable to all entities in the national, provincial and local spheres of government.

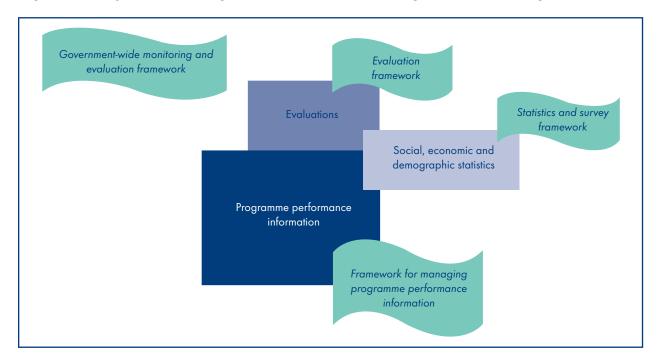

The government-wide monitoring and evaluation system

In 2004 the Cabinet initiated plans for a monitoring and evaluation system for government, and the Presidency subsequently developed the government-wide monitoring and evaluation framework. Although there are various existing systems gathering valuable information within government, there are also a number of gaps in the information needed for planning the delivery of services and for reviewing and analysing the success of policies. The government-wide monitoring and evaluation system seeks to enhance these systems by describing them and explaining how they relate to each other. The system has three components:

- Programme performance information
- Social, economic and demographic statistics
- Evaluations

The following figure illustrates the relationship between these components. It highlights that there will be frameworks dealing with each component. The Framework for managing programme performance information deals with the management of the programme performance information component.

Figure 1: Components of the government-wide monitoring and evaluation system

ANNEXURE 9: FINANCIAL MANAGEMENT CAPABILITY MATURITY MODEL

The financial management capability maturity model (FMCMM) was initially used to assess the financial management maturity of the auditees as part of the audit planning phase. The AG, however, decided to use the same measurement framework in order to ascertain the maturity levels of its own business processes and risks, thus extending the FMCMM to be an integrated capability maturity model (CMM) that not only covers financial management, but looks at the AG processes holistically.

A capability model can be defined as: "A yardstick against which it is possible to judge, in a repeatable way, the maturity of an organisation's processes and compare it to the state of practice in the industry".

It is a tool to measure the current status of an organisation, determine process areas of improvement and plan, prioritise and evaluate the implementation of the areas of improvement.

Maturity models therefore provide best practices, measurement standards and improvement paths.

The term "maturity" refers to the effectiveness of an organisation's development processes. If an organisation uses no processes at all, it is considered immature and thus operates in an environment where risk is high and predictability is low. If the organisation uses refined processes it is considered mature and thus operates in an environment where predictability is high and risk is low.

The levels of maturity are the following:

Level 1: Start-up level where no proper control framework exists	There is evidence that the organisation has recognised that the issues exist and need to be addressed. There are, however, no standardised processes. The organisation as a whole is not process orientated. Instead there are ad hoc processes that tend to be applied on an individual or case-by-case basis. The overall approach to management is disorganised. The success or failure of these organisations depends on the talents of staff, good luck or good fortune. The key focus for improvement at this level would be disciplined processes
Level 2: Development level where a proper internal framework is developed	Processes have developed to the stage where similar processes are followed by different people undertaking the same task. There is no formal training or communication of standard procedures and responsibility is left to the same individual. There is a high degree of reliance on the knowledge of individuals and therefore errors are likely. Here the key focus for improvement would be standard consistent processes.
Level 3: Control level which focuses on the compliance and control	Procedures have been standardised and documented and communicated through training. Projects are managed using repeatable processes and the organisation has the infrastructure to support a process-driven environment. It is, however, left to the individual to follow these processes and it is unlikely that deviations will be detected. The procedures themselves are not sophisticated but are the formalisation of existing practices. The key focus for improvement would be predictable processes.

Level 4: Information level that measures the utilisation of resources with effective results	The economic, efficient and effective utilisation of resources is managed, measured and reflected in reliable financial information.
Level 5: Management level that will determine the utilisation of resources with effective results	It is possible to monitor and measure compliance with procedures and take action where processes appear not to be working effectively. Processes are under constant improvement and provide good practice. Automation and tools are used in a limited or fragmented way. At this level we are looking at continuously improving processes.
Level 6: Optimisation level which enables continuous improvement and learning	This is the highest level of maturity. Processes have been refined to a level of best practice, based on the results of continuous improvement and maturity modelling with other organisations. Information technology is used in an integrated way to automate the workflow, providing tools to improve quality and effectiveness, making the enterprise quick and adaptable.

GLOSSARY OF TERMS

A

Adverse opinion - An adverse opinion is expressed when the effect of a disagreement with management regarding departures from the financial reporting framework is so material and pervasive to the financial statements that the auditor concludes that a qualification of the report is not adequate to disclose the misleading or incomplete nature of the financial statements.

Audit evidence - All the information used by the auditor in arriving at the conclusions on which the audit opinion is based. Audit evidence includes the information contained in the accounting records underlying the financial statements and other information.

Audit matters of governance interest - Those matters that arise from the audit of financial statements and, in the opinion of the auditor, are both important and relevant to those charged with governance in overseeing the financial reporting and disclosure process. Audit matters of governance interest include only those matters that have come to the attention of the auditor as a result of the performance of the audit.

Audit of financial statements - The objective of an audit of financial statements is to enable the auditor to express an opinion on whether the financial statements are prepared, in all material respects, in accordance with an applicable financial reporting framework.

C

Comprehensive basis of accounting - A comprehensive basis of accounting comprises a set of criteria used in preparing financial statements which applies to all material items and which has substantial support.

Control activities - Those policies and procedures that help ensure that management directives are

carried out. Control activities are a component of internal control. (See Internal control)

Control environment - Includes the governance and management functions and the attitudes, awareness and actions of those charged with governance and management concerning the entity's internal control and its importance in the entity. The control environment is a component of internal control. (See Internal control)

D

Disclaimer of opinion – A disclaimer of opinion is expressed when the possible effect of a limitation on scope is so material and pervasive that the auditor has not been able to obtain sufficient appropriate audit evidence to form an opinion and, accordingly, is unable to express an opinion on the financial statements.

Documentation – The material (working papers) prepared by and for, or obtained and retained by, the auditor in connection with the performance of the audit. Working papers may be in the form of data stored on paper, film, electronic media or other media.

Ε

Emphasis of matter paragraph(s) - An auditor's report may be modified by adding an emphasis of matter paragraph(s) to highlight a matter affecting the financial statements which is included in a note to the financial statements that more extensively discusses the matter. The addition of such an emphasis of matter paragraph(s) does not affect the auditor's opinion on whether the financial statements are fairly presented. The auditor may also modify the auditor's report by using an emphasis of matter paragraph(s) to report matters other than those affecting the financial statements, such as material inconsistency of other information included in the annual report.

G

Governance - Describes the role of persons entrusted with the supervision, control and direction of an entity. Those charged with governance ordinarily are accountable for ensuring that the entity achieves its objectives, financial reporting and reporting to interested parties. Those charged with governance include management only when it performs such functions.

ı

Information system relevant to financial reporting:

A component of internal control that includes the financial reporting system, and consists of the procedures and records established to initiate, record, process and report entity transactions (as well as events and conditions) and to maintain accountability for the related assets, liabilities and equity.

Internal control: The internal control system is the whole system of financial and other controls, including the organisational structure, methods, procedures and internal audit, established by those charged with governance, management and other personnel to:

- assist in conducting the business of the audited entity in a regular economic, efficient and effective manner
- ensure adherence to management policies
- ensure compliance with applicable laws and regulations
- safeguard assets and resources
- secure the accuracy and completeness of accounting records
- produce timely and reliable financial and management information.

It provides a framework for considering how different aspects of an entity's internal control may affect the audit. The auditor's primary consideration is whether, and how, a specific control prevents or detects and corrects material misstatements in classes of transactions, account balances, or disclosures, and their related assertions.

Internal control consists of the following components:

(a) The control environment: The control environment includes the governance and management functions and the attitudes, awareness, and actions of those charged with governance and management concerning the entity's internal control and its importance in the entity. The control environment sets the tone of an organisation, influencing the control consciousness of its staff. It is the foundation for all other components of internal control, providing discipline and structure.

Elements of the control environment are:

- communication and enforcement of integrity and ethical values through policy statements, codes of conduct and by example
- commitment to competence
- the "tone at the top", i.e. management's philosophy and operating style
- organisational structure
- human resource policies and practices
- assignment of authority and responsibility
- participation by those charged with governance.
- (b) Risk assessment process: Risk assessment is the process of identifying and analysing relevant risks from internal and external sources to the achievement of the entity's objectives, as identified in the strategic plan, and determining how the risks should be managed.

Risk assessment implies:

- risk identification
- risk evaluation
- assessment of the risk appetite of the organisation
- development of responses to the risk profile.

AUDITOR-GENERAL

- (c) The information system, including the related business processes, relevant to financial reporting and communication: Relevant and reliable information, both financial and non-financial, and the communication of this information are essential to realising all internal control objectives. In order to help ensure the quality of information and reporting, carry out the internal control activities and responsibilities, and make monitoring more effective and efficient, the internal control system should be fully and clearly documented and should be available for examination.
- (d) Control activities: Control activities are the policies, procedures, techniques and mechanisms established to address/mitigate risks and to achieve the entity's objectives. They are an integral part of the entity's planning, implementing, reviewing and accountability for stewardship of government resources and achieving effective results.

Control activities include a range of detective and preventive control activities as diverse as, for example:

- authorisation and approval procedures
- segregation of duties
- access restrictions to, and accountability for, resources and records
- verifications
- reconciliations
- reviews by management of performance
- controls over information processing (application controls)
- general IT controls
- proper execution of transactions and events
- accurate and timely recording of transactions and events
- appropriate documentation of transactions and internal control
- reviews of operations and processes
- establishment and review of performance measures and indicators

- supervision
- human capital management.
- (e) Monitoring of controls: Internal control systems should be monitored to assess the quality of the systems' performance over time. Monitoring is accomplished through routine activities, separate evaluations, or a combination of both. It involves assessment by appropriate personnel of the design and operation of controls on a suitable, timely basis and the taking of necessary actions. It includes regular management and supervisory comparisons, reconciliations and actions.

Ongoing monitoring

- Ongoing monitoring of internal control should be built into the normal, recurring operating activities of an entity. It includes regular management and supervisory activities, and other actions personnel take in performing their duties.
- Ongoing monitoring activities cover each of the internal control components and involve action against irregular, unethical, uneconomical, inefficient and ineffective internal control systems.

Separate evaluations.

- The scope and frequency of separate evaluations will depend primarily on an assessment of risks and the effectiveness of ongoing monitoring procedures.
- Separate evaluations may take the form of self-assessments as well as reviews by internal and external auditors of control design and the direct testing of internal control.

L

Limitation on scope - A limitation on the scope of the auditor's work may sometimes be imposed by the entity (for example, when the terms of the engagement specify that the auditor will not carry

out an audit procedure that the auditor believes is necessary). A scope limitation may be imposed by circumstances (for example, when the timing of the auditor's appointment is such that the auditor is unable to observe the counting of physical inventories). It may also arise when, in the opinion of the auditor, the entity's accounting records are inadequate or when the auditor is unable to carry out an audit procedure believed desirable.

M

Management fraud – Fraud involving one or more members of management or those charged with governance.

Material inconsistency – Exists when other information contradicts information contained in the audited financial statements. A material inconsistency may raise doubt about the audit conclusions drawn from audit evidence previously obtained and, possibly, about the basis for the auditor's opinion on the financial statements.

Material misstatement of fact – Exists in other information when such information, not related to matters appearing in the audited financial statements, is incorrectly stated or presented.

Material weakness - A weakness in internal control that could have a material effect on the financial statements.

Materiality – Information is material if its omission or misstatement could influence the economic decisions of users taken on the basis of the financial statements. Materiality depends on the size of the item or error judged in the particular circumstances of its omission or misstatement. Thus, materiality rather provides a threshold or cut-off point.

Misstatement - A misstatement of the financial statements that can arise from fraud or error (also see fraud).

Modified auditor's report - An auditor's report is

considered to be modified if either an emphasis of matter paragraph(s) is added to the report or if the opinion is other than unqualified.

N

Non-compliance - Refers to acts of omission or commission by the entity being audited, either intentional or unintentional, that are contrary to the prevailing laws or regulations.

0

Opinion - The auditor's report contains a clear written expression of opinion on the financial statements as a whole. An unqualified opinion is expressed when the auditor concludes that the financial statements give a true and fair view (or are presented fairly, in all material respects) in accordance with the applicable financial reporting framework (also see modified auditor's report).

Other information/Other matters – Financial or non-financial information (other than the financial statements or the auditor's report thereon) included – either by law or custom – in the annual report.

P

Planning - Involves establishing the overall audit strategy for the engagement and developing an audit plan, in order to reduce audit risk to an acceptably low level.

Q

Qualified opinion - A qualified opinion is expressed when the auditor concludes that an unqualified opinion cannot be expressed due to the effect of any disagreement with management regarding departures from the applicable financial reporting framework/basis of accounting which result iin material misstatement of the financial statements or due to the limitation on scope being not so material and pervasive as to require an adverse opinion or a disclaimer of opinion.

AUDITOR-GENERAL

R

Rights and obligations (R&O) assertion - The entity holds or controls the rights to assets, and liabilities are the obligations of the entity.

Risk assessment procedures - The audit procedures performed to obtain an understanding of the entity and its environment, including its internal control, and to assess the risks of material misstatement of the financial statement and assertion levels.

S

Significance - The relative importance of a matter, taken in context. The significance of a matter is judged by the practitioner in the context in which it is being considered. This might include, for example, the reasonable prospect of its changing or influencing the decisions of intended users of the practitioner's report; or, as another example, where the context is a judgement about whether to report a matter to those charged with governance, whether the matter would be regarded as important by them in relation to their duties. Significance can be considered in the context of quantitative and qualitative factors, such as relative magnitude, the nature and effect on the subject matter and the expressed interests of intended users or recipients.

Significant risk - A risk that requires special audit consideration.

Subsequent events - These are two types of events occurring after period-end:

- (a) Those that provide further evidence of conditions that existed at period-end; and
- (b) Those that are indicative of conditions that arose subsequent to period-end.

These conditions can be either favourable or unfavourable.

Substantive procedures - Audit procedures

performed to detect material misstatements at the assertion level; they include:

- (a) Tests of details of classes of transactions, account balances and disclosure; and
- (b) Substantive analytical procedures.

Sufficiency - Sufficiency is the measure of the quantity of audit evidence. The quantity of the audit evidence needed is affected by the risk of misstatement and also by the quality of such audit evidence.

Т

Tests of control - audit procedures performed to obtain audit evidence about the operating effectiveness of controls in preventing, or detecting and correcting, material misstatements at the assertion level.

U

Uncertainty - A matter outcome depends on future actions or events not under the direct control of the entity but that may affect the financial statements.

Understanding of the entity and its environment – The auditor's understanding of the entity and its environment consists of the following aspects:

- (a) Industry, regulatory, and other external factors, including the applicable financial reporting framework.
- (b) Nature of the entity, including the entity's selection and application of accounting policies.
- (c) Objectives and strategies and the related business risks that may result in a material misstatement of the financial statements.
- (d) Measurement and review of the entity's financial performance.
- (e) Internal control.

V

Valuation and allocation (Va) assertion – Assets, liabilities and equity interests are included in the financial statements at appropriate amounts and any resulting valuation or allocation adjustments are appropriately recorded.

Value-for-money (VM) assertion – A transaction, event, programme, project, part of a project, process, etc. promotes the economical acquisition and efficient and effective use of resources.
